ANALYSIS OF Cancer in Oklahoma's SoonerCare Program

Prevalence Rates

Prevalence

Eight counties had cancer prevalence higher than 2.0% in SFY2023. There is some evidence of clustering in the southeastern part of the state.

SoonerCare Members with Cancer

In SFY2023, cancer was more prevalent among adults, females, and Caucasians than would be expected based on the demographic composition of all SoonerCare members. See details below. The black line represents the percent of total SoonerCare members.

94.1%

were adults
21,182 members

66.3%

members had
cancer

ANALYSIS OF Cancer in Oklahoma's SoonerCare Program

Reimbursement Cost

While only 1.5% of SoonerCare members had cancer in SFY2022, the total reimbursement associated with their services made up 5.6% of all SoonerCare reimbursements paid in SFY2022. The cost of providing care to members with cancer is disproportionately higher than the prevalence of cancer among SoonerCare members.

The total reimbursement for members with cancer increased to \$539M in SFY2023, due not only but primarily to an increase in the SoonerCare population during this year. There was also a continued increase in per-member reimbursement.

Annual Reimbursement for Members with Cancer

SoonerCare Members with Cancer: Percent of Total Reimbursement Compared to Percent of SoonerCare Enrollment

Average Reimbursement per Member with Cancer

\$538,882,457

Total reimbursement for members with cancer

\$23,934

Average reimbursement for members with cancer

	Total Reimbursement	% of Total Reimbursement	Reimbursement per Member
Dual Eligible	\$129,444,676	24.0%	\$14,231
Non-Dual Eligible	\$409,437,782	76.0%	\$30,512
Adult	\$498,829,049	92.6%	\$23,550
Child	\$40,053,408	7.4%	\$30,048
